Review of Operations

1. The Company progresses toward a model where the Company actively participates in banana fibre product production and manufacturing in Egypt and Australia.

In the longer run the Company believes the best commercial position for it is to be the developer and licensor of Intellectual Property. However the Company has experienced many frustrating challenges in bringing that strategy to a beneficial commercial outcome, particularly given the economic climate and the risk averse nature of potential participants in a new business venture with new technology.

The Company acknowledges that it must first partner with others to get the initial commercial banana fibre production facilities operational to satisfy concerns about the risks believed to be associated with being the first to undertake the manufacture of banana fibre products worldwide.

2. In November 2014 the Company announced it had entered into a binding Joint Venture Agreement for a banana fibre business project to manufacture banana fibre fruit and vegetable trays utilising natural materials made from waste banana fibre (as an alternative for plastic trays presently used by the industry). This followed an extensive evaluation and analysis and the contractual "off-take" commitment of an established distributor (the other joint venture partner) of such products in Australia to the wholesale fruit and vegetable industry, (refer ASX Announcement 7 November 2014).

Work on that JV progresses albeit slower than the Company would like. Presently a project team is undertaking a re-evaluation of all elements of the proposed JV from the banana plantation through to the market for products.

3. With the Egyptian political climate stabilising and business environment improving the Company transported further machinery from Walkamin to the Papyrus Egypt, Sohag factory in Egypt, to enable the Papyrus Egypt banana fibre project to commence once the factory is commissioned and all requisite capital funding is secured for the project.

The machinery has been under the control of our agent in Sohag until such time as appropriate payment is made by Egypt Banana Fibre Company to the Company to satisfy the purchase obligations for the machinery.

Our Egyptian partner has completed the construction and fit-out of the factory building in Sohag which is ready to house the manufacture and production facilities comprising the production line of Papyrus machinery and equipment.

Our Managing Director, Ramy Azer, is presently in Sohag undertaking the engineering work required to enable the manufacturing and banana fibre production facilities to be commissioned. The Company will advise the market as soon as the manufacturing and production facilities are commissioned.

4. The Company continues to operate on an absolute minimum cost basis to preserve working capital.

During the period The Company entered into agreements with certain shareholders to raise \$100,000 by way of a placement of 10,000,000 ordinary fully paid shares in the capital of the Company at a price of \$0.01 per new share. The funds raised funded working capital requirements and, in particular, (refer ASX Announcements 14 September 2015 & 15 September 2015).

The Company's Managing Director Ramy Azer and his wife Phoebe Azer facilitated a second cash loan to the Company during the period 2014 through their wholly owned company Talisker Pty Ltd. The Company has agreed that Talisker shall lend the Company up to an amount of \$250,000 ("the loan") which may be drawn down by the Company from time to time as required, (refer ASX Announcement 7 November 2014).

The Company met expenses as and when they fall due and there are no known unbudgeted expense items. The Directors including the Managing Director have continued to forgo their remuneration.

5. The Company's Annual Report was published (ASX Announcement 27 October 2015). The Annual General Meeting was held on 26 November 2015 whereat the Chairman provided a briefing of the Company's operation and in particular why previously stated objectives had not been achieved in the current economic climate and what had been achieved during the previous financial year. (See ASX Announcement 26 November 2015).
6. Following a comprehensive review the Company has consolidated its patent holdings as hereunder:
 - a. Method and Apparatus for Removing Sheets of Fibres from Banana Plants (Original Patent) - Patent rights have been granted for this patent in the following jurisdictions: Australia, China, Egypt, France, Germany, Hong Kong, India (pending), Japan, Malaysia, Philippines, Korea, Thailand (pending), United Kingdom, USA and Vietnam. This patent is for the production of veneer from banana tree trunks.
 - b. Improved Fibre Furnish - Patent rights have been granted in the following jurisdictions: Australia (pending), China (pending), Egypt, France, Germany, Hong Kong (pending), United Kingdom and USA. This patent is for the production of fibre chips from banana tree trunks (to be used for the making of panel and other products) and directly relates to fibre production.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we complied with the independence requirements of the Corporations Act 2001.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Papyrus Australia Limited is not in accordance with the Corporations Act 2001, including:

- a giving a true and fair view of the consolidated entity's financial position as at 31 December 2015 and of its performance for the half-year ended on that date; and

Material uncertainty regarding going concern

Without qualification to the conclusion expressed above, we draw attention to Note 12 to the financial report which indicates that the consolidated entity incurred a net loss of \$107,512 during the period ended 31 December 2015 and, as of that date, the consolidated entity's current liabilities exceeded its current assets by \$538,182. These conditions, along with other matters as set forth in Note 12, indicate the existence of a material uncertainty which may cast significant doubt about the consolidated entity's ability to continue as a going concern and therefore, the consolidated entity may be unable to realise its assets and discharge its liabilities in the normal course of business, and at the amounts stated in the financial report.
